DIGITAL SIGNAGE

SKYKIT beam

Skykit Beam is a powerful content management system built for digital signage. Use it to push content to a few screens in one building or thousands across the globe. A streamlined user interface and remote management capabilities make Skykit an excellent choice for organizations of any size.

Beam users also benefit from:

- Easy Content Creation
- Wide Range of Content Types
- Live Streaming Capabilities
- Content Scheduling and Automation
- Proof-of-Play Reporting
- Device Health Monitoring
- Multi-Level Security
- Remote Troubleshooting
