

source | sense

Source Sense is a powerful platform with a user interface that provides real-time and historical reporting, monitoring, and alerting automation. Source Sense integrates through our powerful API to enhance current systems or it can operate standalone. With NIST “National Institute of Standard and Technology” Lab Certified sensors available when regulations are required from hardware to software, it can exceed those requirements. Source Sense can facilitate and automate the collection of temperature data, and provide real-time configurable alerts for FDA, Food, and all other temperature sensing needs.

Source Sense is a powerful platform with a single pane of glass. It enables you infinite plug-and-play IoT solutions.

- ✓ NIST Certification
- ✓ Temperature Units & Probes
- ✓ Exceeds FDA Requirements
- ✓ Daily Reports
- ✓ Easy To Deploy & Use
- ✓ Lifetime Reporting History

Cost Effective
